Large numbers of farmers, Agri advisers and trade personnel from the Republic, Northern Ireland and Britain visited the McAree Engineering stand at the Livestock Event to view their wide range of meal silos and tote bins.

Farmers in Quality Assurance schemes need to keep feed safe, secure and free from contaminants. It also makes good economic sense to

protect valuable animal feed from vermin and spoilage. In addition as herd size increase dairy and beef farmers require bigger meal silos.

Eamon McMeel, Sales Manager said they were happy to be exhibiting at this event. "Our sales in Britain for V-Mac feed silos have been increasing and McAree will also have a stand at the Great Yorkshire Show, the Royal Welsh Show and at Agriscot.
